

Supportive Day Program

THE PROGRAM: The Supportive Day Program offers a structured, supervised and stimulating environment for frail elders, those with mild to moderate dementia or cognitive decline, and those who are socially isolated. Program activities encourage independence and socialization, while building self-esteem in participants. A wide range of activities are offered, including: reminiscence groups, games, creative projects, gentle exercise, health clinics, social events and monthly theme parties. Caregivers praise the program as noted below: “This has allowed her to live with us - otherwise she may have been placed in a nursing home. Thank you for this terrific program that has been an answer to our prayers.” “I knew that having my wife come to this program would be better for me, but I came to realize just how happy and excited she was to be part of such a stimulating club.”
